

INSEAI 2023 – DISCUSSION

PROGRESS, CHALLENGES, AND PROSPECTS FOR THE LABOR ECONOMY AND CARE ECONOMY IN PARAGUAY

Marcela Achinelli
(UNA, Paraguay)
machinellib@gmail.com

ABSTRACT

This discussion examines the challenges of the care economy in Paraguay, linking care policies to labour policies within the context of demographic changes such as declining birth rates and rising life expectancy. Using statistical evidence on time use and employment, the findings highlight that beyond regulatory progress, the key transformation required is cultural: recognizing care work as decent work, with fair conditions and equitable access to services. The session will be in Spanish with automatic translation into English for those who need it.
