### ABSTRACT

The **INSEAI 2023** network is presented as a valuable source of knowledge on informality and formality. **Klaus West** makes a proposal to expand this structural understanding by enabling action at the interface between informality and formality. To this end, various interfaces are examined and the resulting strategies and solutions for transitions from informality to formality are highlighted as potentially valuable for INSEAI 2023 target groups, with a recommendation to develop suitable products and formats for their dissemination.
